

RENEWABLE ENERGY TRUST

Final Clean Energy Choice® Matching Funds To Be Disbursed in January 2010

**Town of North Andover,
Mass.
Grant of \$16,578.13**

The Trust is providing the Town of North Andover with a Clean Energy Choice grant of \$16,578.13 to help cover the costs of a 2 – 3 kW solar photovoltaic installation at the North Andover High School. The Town is also hoping to obtain additional EECBG funding to expand the system. This installation will reduce the school's energy costs and will help educate students about the power of clean energy technologies. The installation will also include a Data Acquisition System that will allow viewing of real-time data on any computer on the school's local area network.

From October 2004 through June 2009, Clean Energy Choice provided matching grants in proportion to voluntary contributions for renewable energy made by North Andover residents.
